BIOMIMETIC DENTAL SCIENCE

1 For best results, use just before bedtime.

2 After brushing, use your fingers to gently draw back your lips to reveal your teeth. Lightly dry your teeth with a soft cloth.

3 Using the included applicator brush, apply a thick layer of New White Enamel Anti-Aging Serum to each tooth (included porcelain crowns and veneers), extending the gel over your gum line.

4 After applying, keep your lips drawn for 10-15 seconds. For maximum benefit, don't rinse the New White Enamel Anti-Aging Serum from your teeth and gums.

5 Avoid eating or drinking for at least 30 minutes after application.

6 Apply the New White Enamel Anti-Aging Serum for a week and repeat treatment after 1-3 months to maintain results.

Our New White Enamel Anti-Aging Serum is healthy, safe and can be used by everyone in the family. It does not cause any tooth sensitivity or gum irritation.

To maintain the white enamel effect for a longer period use vVARDIS products as part of your daily ritual.
